

1 Situated delivery

Only the selected producer runs and returns a versioned artifact.

id | version | digest

2 Recipient judgment

The real consumer reads, uses, revises, or rejects the artifact.

judgment | action | owner

3 Public role evidence

A responsibility gate admits attributable, complete, non-duplicate evidence.

evidence | reason | watermark

6 Delayed credit

Only the matching future responsibility opportunity receives credit.

state' | digest' | lag

5 Target outcome

Quality, adoption, rework, and complete cost are scored independently.

quality | cost | UNKNOWN

4 Future assignment

A local selector reads the sealed snapshot before target execution.

assignment | $p(a)$ | read-cut

dashed edge: delayed feedback changes a later read cut only
